Tutor.com engaged LearnPlatform by Instructure to examine the impact of Tutor.com on K-12 student outcomes.

y

Researchers conducted a matched analysis of 746 students in grades 9-12 from a California school district for the 2022-23 school year. The district is predominantly Hispanic (59%) and Asian (35%). Approximately 85% of households have broadband internet, and 23% have income below the poverty level.

F

The below results are all statistically significant.

A - - , GPA .

C

Given multiple positive outcome findings, this study provides results to satisfy ESSA evidence requirements for Level II.
